Robert's expertise includes the management and monitoring of construction site personnel to expedite and facilitate the timely completion of work. His construction management experience includes a variety of projects including hospitality, commercial retail, design-build, medical, industrial, high-rise office and federal government projects ranging from hundreds of thousands to tens of millions of dollars in value.

Robert is skilled in project coordination; planning, Procore, Timberline software, performing safety assessments, developing work plans, implementing controls, providing and overseeing of training, selecting proper personal protective systems, monitoring work, U.S. ACE/OSHA regulations and fully capable of maintaining a safe and healthy work environment.

With a degree in Civil Engineering and Construction Management from Wentworth, as well as being a certified Construction Health and Safety Technician, Robert understands the building process from conception to completion and has the technical expertise to keep everyone safe on the job.

One of Robert's strengths is coordinating subcontractors onsite. His experience in construction management has laid the foundation for being successful in communicating critical safety information to all the subcontractors, trades, management and other visitors onsite.

Robert has worked on several federal contracts and is very familiar with the requirements of US Army Corps of Engineers projects. He holds a US Army Corps 40 hour Hazard Awareness Certification, US Army Corps Construction Quality Management Certification, as well as the US Army Corps Qualified and Competent Fall Protection Certification – EM 385-1.

In addition to managing safety onsite, Robert is an excellent instructor. He engages his classes with real-world examples that they can take back and apply to their work in the field. Robert is certified to teach OSHA 10 and 30 Hour Construction Outreach.

Robert works with UASC clients both onsite, managing safety, doing audits, inspections, and regular toolbox talks, and behind the scenes developing health and safety plans and management systems.
