Emidio is a highly accomplished Safety and Security professional with extensive experience identifying and implementing solutions to ensure a safe, compliant, and secure workplace. During his career, he has been responsible for developing and implementing company-wide strategic programs to meet objectives in the areas of worker safety, security and environmental impact.

Emidio is experienced in planning and managing all OSHA required safety training and compliance programs, worker's compensation claims management, safety incident investigations, evacuation planning and drills, fire detection and suppression system upgrades and emergency response procedures development and documentation. He developed a remote worker office ergonomics manual and a new hire office ergonomic evaluation program to proactively address cumulative trauma disorders and has conducted over 2,800 office workstation ergonomic evaluations.

A Certified Protection Professional, Emidio has managed a contract safety staff, led and resolved internal investigations, as well as actively participated in emergency management and business continuity initiatives. He is an experienced trainer with over 35 years of safety and security experience, he has conducted training sessions covering a multitude of courses, including workplace violence prevention, Management of Aggressive Behavior (MOAB), Hazard Communication/Right to Know, remote worker safety practices, ergonomics and CPR/AED.

In his role as Regional Director, Emidio assures delivery of quality services to all clients and the overall management of staff assigned to divisional activities. He works with clients to develop a program delivery schedule that provides consulting as needed at client's locations.

Emidio performs assessment of prospects' and clients' consulting requirements with the use of surveys, focus groups, and client meetings with various compliance and risk management support tools. He collaborates with functional management teams to assess ongoing and future consulting and development needs as well as effectiveness of established consulting programs.
