*Bachelors of Science, Environmental
Health and Safety*

UNITED ALLIANCE SERVICES

Brandon has 10+ years delivering work site safety inspections, oversight and auditing to Fortune 500 companies, public utilities and general contractors. He has conducted safety and health audits to assess compliance with OSHA, state and local regulations in construction, manufacturing and utility settings.

After graduating Keene State College with an EH&S degree, Brandon started out his career working with the iron workers of Local 40 providing safety oversight on the Goldman Sachs building. Deciding to stay in the construction industry, Brandon continued serving safety oversight for multiple high profile high rises construction projects.

Wanting to expand and learn more about his craft, Brandon took on the Honolulu Rail project in Oahu, HI. While working for Royal Contracting as their full time Construction Safety and Security Manager (CSSM), overseeing three Construction Safety and Security Representatives (CSSR), Brandon served as the prime contractor with upwards of 15 sub-contractors and the CSSRs. He was responsible for document control including AHAs, new hire orientations, daily checklists, weekly toolbox topics for On-Call work crews. He conducted weekly/monthly HART meetings to discuss issues such as scheduling, public health and safety, and coordination between existing and future sub-contractors to conduct work.

Brandon is a dedicated instructor and has managed and provided training on OSHA standards including hazard communication, bloodborne pathogens, personal protective equipment and forklift safety.

Brandon assists our clients with site-specific health and safety program development, safety and health inspections, and conducting site safety auditing and safety management services for large commercial projects. He brings his tireless work ethic and occupational health and safety expertise to each UASC client he works with.
