Don is a Safety Professional with more than 15 years of experience in occupational health and safety. After earning his Bachelor of Science degree in Occupational Safety from Keene State College, he spent the majority of his career in the manufacturing field. He has held multiple positions in EHS, Plant Management, Human Resources and Technology.

While working for a large concrete manufacturer, Don transformed the safety program from a rules and regulatory culture to one driven by perceived risk and employee engagement. He has proven that he can create, improve and implement a safety program both in the written and practical applications.

His professional experience includes:

- Program Development
- Leadership
- Safety Evaluation/Audit
- OSHA Recordkeeping
- Behavior Based Safety
- PIT Instructor
- Safety Training Programs
- Injury Management
- Decision Driving
- OSHA/EPA/DEP
- Visual/Safe Operating
- CPR/First Aid/AED Certified
- Incident Investigation
- Lean Manufacturing / Six
- Metrics
- Risk Reduction
- SAP Success Factors
- LMS Administration

In addition to his safety experience, Don has also been a leader throughout his career. His experience as a Plant Manager at a factory with \$10M in annual revenue enabled him to see the budgetary and financial aspects of operating a business while gaining valuable knowledge on leadership.

Don's unique skills and style bring to United Alliance Services expertise in making technical updates to training material while working with clients and concentrating on business growth.
