### EDUCATION

---

Bachelor of Arts,  
*Southern New Hampshire University*

Prior to joining United Alliance Services, Frank spent over 18 years in the Safety and Training field for multiple large general industry companies overseeing the safety and loss prevention programs for production operations and vendor/supplier operations activities. He was responsible for implementing and managing safety programs and compliance training operations resulting in large decrease in workmen's compensation issues.

Frank provides site safety auditing and safety management services for our clients as well as health and safety plan development and safety and compliance training. His ability to lead and foster an appreciation for safety in teams has improved safety for our clients and lowered their insurance costs and reduced injuries and time away from work.

As a certified OSHA Outreach instructor, Frank is able to share his own experience as it relates to the training material, which gives participants insight as to how they can apply what they are learning to their own jobs. He is a dedicated educator who understands the need for extensive and informative training for both management personnel and operational personnel.

His work ethic and professionalism are an asset to our safety consulting team.
