Occupational Safety and Health and  
Applied Sciences  
*Keene State College, Keene, NH*

Joe is a safety professional that has worked in construction since 2018. He graduated from Keene State College with a degree in Occupational Safety and Health and Applied Sciences. During his time at Keene State, he worked part time as an Environmental Health and Safety intern for the Physical Plant on campus as well as a part time tutor for classes including Law & Ethics in Safety and Health Hazard Identification.

While working with Hart Companies, Joe helped maintain the OSHA 300 Log, assisted in maintaining the corporate HAZCOM program and Safety Data Sheets, assembled Personal Fall Arrest Systems equipment, Anti-Fatigue Mats and related gear. He conducted on-site tool box talks and participated in meetings with project related contractors. Joe also developed JHA's for project-specific tasks and developed corporate office floor plans incorporating fire extinguishers, First Aid/ CPR/ AED materials, emergency showers, eye washes, exit routes and other life safety features.

While working with the Keene State College Environmental Health and Safety Director, Joe checked all fire extinguishers, fire alarms, AEDs, emergency eye washes, and emergency showers throughout the campus.

Joe engineered an online new employee training video, designed a social media campaign to promote safety on campus, conducted air sampling in the wood shop and collected data to help improve the work environment. He also collected data in regards to the efficiency and functioning of ventilation in the TDS building, updated chemical inventory on campus, and was involved in the hazardous waste disposal process.

In his role as Health and Safety Consultant, Joe assists our clients with site-specific health and safety program development, safety and health inspections, and conducting site safety auditing and safety management services for large commercial projects.
